

AeHub

┌ USB 3.0 ports that can transfer data up to 5 Gbps.

┌ AeHub supports Microsoft Windows, Mac OS X and Linux.

┌ It is suitable to use in harsh environments.

┌ It uses Lemo secure connectors.

┌ It integrates protections which prevent the connected devices from suffering damage.

┌ Easy installation.

“AeHub expands your computer’s USB 3.0 with a reliable connexion”

AeHub expands your computer's USB for data transmission when multiple devices are simultaneously connected, such as high-resolution cameras or other devices. USB 3.0 ports can transfer data at up to 5 Gbps, 10 times faster than the USB 2.0.

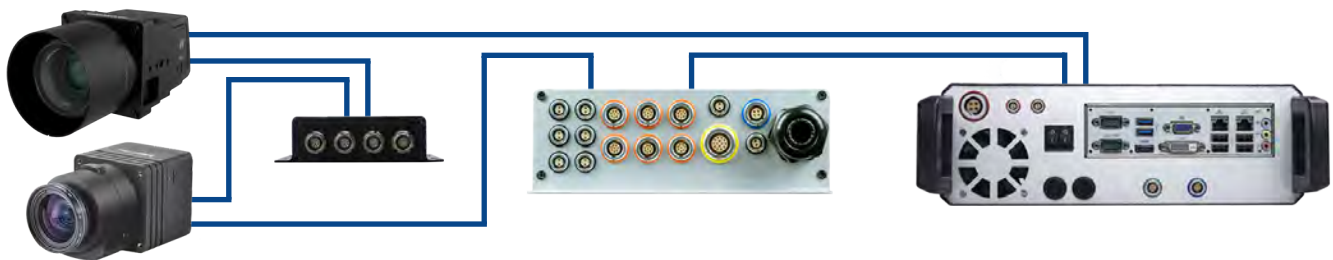

The AeHub is able to maintain the USB 3.0 transfer rate due to the safe connection of Lemo connectors. It is the only HUB 3.0 on the market that uses Lemo secure connectors, making it suitable to use in harsh environments such as aviation.

Among other features, AeHub integrates protections which prevent the connected devices from suffering damage in the event of any potential danger.

MAIN FEATURES

Input interface	4 LEMO connectors
Output interface	1 LEMO connectors
Operating systems	Windows, Mac OS X and linux (it doesn't need drivers)
Medidas	100 x 104,4 x 28,3 mm
Voltage	from 11 V to 36 V
Power connector	1 LEMO connector

Cameras:
Hasselblad
PhaseOne

AeHub
